INTRODUCTION

CALIFORNIA CITIES, TOWNS AND COUNTIES was designed to provide concise yet comprehensive one page profiles for all incorporated places (cities and towns) and counties in California. With new cities incorporating yearly, the number of municipalities in the book will increase each year. A profile page for a city will be added the first year there is revenue and expenditure information available, which is usually a full year after the date of incorporation. This year the newly incorporated cities of Laguna Niguel, Lathrop, Temecula, and Yucaipa have been added to the book for a total of 456 municipal profiles and 58 county profiles, with San Francisco falling under the categories of both a city and a county.

Of the 58 counties, three (Alpine, Mariposa, and Trinity) have no incorporated places at all, and of the remaining counties the number of incorporated places ranges from one each in the counties of Calaveras, Del Norte, Inyo, Lassen, Modoc, Mono and Plumas, to 86 in Los Angeles County.

The book contains one page for every incorporated place and county in the state. These pages are arranged alphabetically by city or county name within the municipal or county profiles sections. Each page has the same format which organizes the data into eight categories, with the result being that information about a specific city or county can be found rapidly and comparisons can be made easily. Following the county profiles section there are two appendices. Appendix A contains the names and party affiliations of elected representatives to Congress, the State Senate and the State Assembly. Appendix B contains information on all the school districts listed on municipal profile pages as also serving that city. The school districts in Appendix B are arranged alphabetically by name of the district.

INTRODUCTION TO THE DATA

The information in this volume has been obtained from a variety of sources. In order to maximize the usefulness of the volume it is important to disclose where each piece of information came from. This is especially important to researchers who have questions about how the data was gathered and what some of the terms used mean. The best answers to these questions are found in the originators of the data which we will cite in the Explanation of the Categories to follow.

It is also important to cite the year of the data. In all cases this is the latest year for which complete data was available for all local governing bodies as of November 30, 1991. Most data is from 1990 and 1991 and the dates are indicated in the headings themselves.

EXPLANATION OF THE CATEGORIES

Demographics & Socio-Economic Characteristics

The 2000 Population projections on the county pages were prepared by the California Department of Finance, Population Research Unit. The 1987 income figures are the most recent estimates from the U.S. Bureau of the Census. All other information in this first column comes from the 1990 U.S. Census. It is expected that additional 1990 Census data on income and poverty and civilian labor force will be available for the next edition of this book.

In order to fully appreciate census information, it is important to understand how the Bureau collects its data and defines its terms.

Race, as used by the Bureau of the Census is not meant to denote any scientific or biological concept of race. The sub-groups displayed here represent the self-categorization of respondents. It should also be noted that Hispanic origin is not a racial category. Persons may be of any race, and be of Hispanic origin as well. As a result, only the six sub-groups under race add to the total 1990 population.

A **household** is the person or persons occupying a housing unit. A **housing unit** is the physical structure the people occupy (for further definition, see Housing & Construction below). Not all persons live in households. Some, for example, are members of the armed forces, or are inmates of institutions, or live in group quarters. As a result the total number of persons in a city or town can be greater than the number of persons living in all households of that town. A **family household** is a type of household, one in which two or more persons (including the householder) who are related by birth, marriage, or adoption, live together. Thus, there can be one person households, but no one person families. The subgroups displayed here under households were selected for potential interest and by no means represent a full breakdown of all types of households.

Housing and Construction

All data under **Housing Units, 1990** comes from the 1990 U.S. Census.

A **housing unit** is a house, apartment, mobile home or trailer, group of rooms, or single room occupied as a separate living quarter or, if vacant, intended as a separate living quarter. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building, and which have direct access from the outside of the building or through a common hall.

For this publication, a **single family unit** is defined as a housing unit which does not share the building with any other housing units, nor is its building attached to any other structure. In Census terminology, it is defined as "one (1) unit in structure, detached."

A housing unit is **owner occupied** if the owner or co-owner lives in the unit, even if the unit is mortgaged or not fully paid for. All other housing units are considered **renter occupied.**

Statistics for **New Privately Owned Housing Units Authorized by Building Permit** come from annual U.S. Bureau of the Census reports for 1988, 1989, and 1990. Places which issue building permits are asked to report monthly to the Bureau. County profile pages show building permits issued by the county for unincorporated areas only.

General Information

The **address** and **telephone number** shown are for the central location for municipal or county business; i.e., the city hall, city administrative offices, county court house or county administrative offices. **Land area** and **population density** for cities and counties are from the 1990 U.S. Census.

Type of government was obtained from our annual mail and telephone survey. General law cities derive their power based on acts of the state legislature. Their powers are enumerated and structure specified by state Government Code. Charter cities are formed by citizens adopting a charter and establishing the organization of the basic law of the city. The state legislature has less control over the charter cities' local affairs.

General law counties elect members of their Board of Supervisors by district, and charter counties have the option of electing their Board members by district or at large.

Voters & Government Officials

Registered voter data was compiled from information provided by the Office of the Secretary of State, Board of Elections, in their Report of Registration, dated October, 1991. Numbers do not add to total because not all party affiliations are shown, only Democrat and Republican.

The numbers of the **legislative districts** which fall within the boundaries of each municipality or county are from the office of the Senate Democratic Caucus and the Speaker's Office of Majority Services. Names of the office holders for each district, and their party affiliation, are based on current (December, 1991) information provided by the office of the Secretary of State and can be found in Appendix A, following the section of the book on County Profiles.

Local and county **officials' names,** and names of the members of the county **Boards of Supervisors** were gathered from a mail and telephone survey done in December, 1991, by the editor. In each county there are five members of the Board of Supervisors and they represent specific districts within the county. However, San Francisco is a consolidated City and County and has eleven members on their Board of Supervisors who are elected at large and do not represent specific districts.

Public Safety

The names of the **Police and Fire Chiefs** (municipal pages) and **Sheriffs** (county pages) come from our mail and telephone survey done in December, 1991. **Sworn officers, Total Crimes,** and **Total Violent Crimes** come from 1990 statistics provided by the California Department of Justice, Bureau of Criminal Statistics.

Firefighter information was compiled from a list provided by the State Fire Marshal's office. Cities showing N/A in either the Police or Fire sections have no municipal police or fire department, and usually have contracted with the county sheriff's department or county fire marshal or another municipal police or fire district for these services. The abbreviations M/Paid or M/Vol. stand for mostly paid or mostly volunteer.

Public Library

All information on libraries, both city and county, was taken from California Library Directory, 1991 and California Library Statistics, 1991, published by the Library Development Services Bureau of the California State Library, Sacramento, California, 1991. Municipal profile pages include information on city public libraries only. Where there is no city library, "Served by County Library" indicates a branch of the county library is located there or serves the community. County library information is shown on the County Profile pages. **Number Branches** includes branch outlets of the main library and stations, which are smaller than branches.

Municipal Finance/County Finance

Information in this category for cities has been taken from the Annual Report of the State Controller Financial Transactions Concerning Cities of California for fiscal year 1989-90. The information published by the State Controller was extracted from reports prepared by city fiscal officers and submitted to the state. We have used figures from the **Total Revenues** and **Total Expenditures** columns for all line items in our Municipal Finance section.

County Finance information comes from Counties of California, Financial Transactions Annual Report, 1989-90, also published by the State Controller. Here again the State Controller extracts the data from reports filed by county Auditors. We have used their terminology **Financing Sources** and **Financing Uses** and our data comes from their Totals column for each line item.

Financial information for both the City and County of San Francisco is shown on the San Francisco municipal profile page only.

School System

Name, address, telephone number, name of superintendent, and **grade plan** of public school districts were taken from California Public School Directory, 1991, published by the California State Department of Education, Sacramento, California. Many cities are served by more than one public school district. If the Public School Directory showed a district had at least one school located in the city on the profile page, we show that district as serving that city. Due to space limitations, expanded information about only one school district can be shown on each profile page. The district shown on the profile page will be either the only district for that city, or the district with the highest grade level. If there are other districts serving the municipality, they are listed at the bottom of the page and information about the districts can be found arranged alphabetically by name of district in Appendix B in the back of the book.

The following will help clarify the terminology used in the school district names: A *unified* school district includes both elementary and high school educational levels. An *elementary* school district usually includes kindergarten and grades one through six or eight. A *high school* district usually includes grade nine and above but may include grade seven and above. The word *union* in the name of an elementary school district indicates that it was formed from two or more districts. The word *union* in the name of a high school district indicates that it includes two or more elementary school districts. A *joint* district includes territory from more than one county.

All other information displayed under headings for this section comes from data provided by the California State Department of Education, Program Evaluation and Research Division, and is for the school year 1990-91 except where indicated.

Enrollment includes all regular day school students enrolled for all grades in the district.

High school graduates shows graduates for 1990, the latest year available, in districts that have high schools.

Full time teachers includes people who teach full time plus the sum of all other teachers expressed as full time equivalents.

Pupil teacher ratio shows the number of pupils per teacher and was reached by dividing the number of pupils by the number of teachers.

Average teacher salary includes only those teachers who are teaching full time and excludes the sum of full time teacher equivalents. 1988 data shown here is for the last year available from the California State Department of Education.

Per pupil expenditure is computed by the California Department of Education, Local Assistance Bureau and is based on the amount spent for education divided by the number of students in average daily attendance (ADA) to give an average cost per pupil in the district.

District average CAP (California Assessment Program) reading scores for grade 8, 1990, were provided by the State Department of Education, Division of Planning, Evaluation and Research. **Scores** for districts can range from 100 to 400, with **percentile** showing where that district falls in comparison with all other districts in the state; i.e., a percentile of 77 means 77 percent of California districts had a score lower in 8th grade reading.

SAT (Scholastic Aptitude Test) scores for grade 12, 1991, were also provided by the Program Evaluation Division and are weighted averages for all high schools in the district. Scores in **verbal** and **math** can range from 200 to 800 each. On the county profile pages the SAT scores shown are the weighted averages of all the high schools in the county and were computed by the Program Evaluation Division.

The goals of education are complex and standardized tests are available to measure the degree of attainment of only a few of those goals. Standardized test scores should not be the only criteria used to evaluate a total educational program. The reader must realize that only a small amount of the information that is required for a total evaluation process is provided in district profiles, and for a more in-depth look should talk with the districts directly and do extensive research of all data available from the schools, the districts and the California Department of Education.

DISCLAIMER

CALIFORNIA CITIES, TOWNS AND COUNTIES contains thousands of pieces of information. Every reasonable precaution, along with a good deal of care was taken in its preparation. Despite all efforts it is possible that some of the information contained in this book may not be accurate. Some errors may be due to errors in the original source materials, others may have been made by the compilers of this volume. An incorrect spelling may occur, a figure may be inverted and similar mistakes may exist. The compilers, editors, typist, printers, and others are all human, and in a work of this magnitude the possibility of error can never be fully eliminated.

If any piece of information is believed to be inaccurate, please contact the publisher. We are eager to eliminate any errors from coming editions and we will be pleased to check a piece of information.

The publisher is also aware that some users may apply the data in this book in various remunerative projects. Although we have taken all reasonable, responsible measures to insure total accuracy, we cannot take responsibility for liability or losses suffered by users of the data. The information provided here is believed to be correct at the time of publication. No other guarantees are made or implied. The publisher assumes no liability for losses incurred by users, and warrants only that diligence and due care were used in the production of this volume.
